

Advanced Handler's Workshop

Location: Wildrose Training Facility, Oxford, Mississippi

This workshop will focus on the Wildrose methods for advanced retriever handling, both upland and waterfowl, hand signals to blinds. Emphasis will be on developing handlers' skills for transitional training and hunting situations based on the unique Wildrose training principles. Topics include: handling on water, advanced steadying drills, upland walk ups, lining on multiples, memories (circle) and blinds. A transitional training exercise will be conducted to include all participants. Participants will need a dog that is familiar with hand signals and the participant must have attended the Wildrose Basic Retriever course. Bring waders, duck calls, rain gear and shotgun with one box of light load shells.

Mike Stewart, Owner/Trainer, Wildrose Kennels
