

**FTCh Edenlab Angus
"Angus"**

*Weight: 64 lbs. Imported
October, 2000*

Angus is an imported Field Trial Champion earning his title in 1999. He is a dominant black with a stately appearance, best described as a focused, all-business retriever. Angus offers a most pleasing calm temperament in the blind, field, or around the home. He is one of the finest lining English labs we have seen. This feature combined with his qualities of marking, ease of handle, excellent nose and superb speed make Angus an excellent retriever of both waterfowl and upland game. His ability proved effective in the ice-covered wetlands of Arkansas during the 2000-2001 duck season as he made repeated retrieves over ice tracking numerous cripples with amazing speed and accuracy without

regard to the challenging conditions. He has the heart and drive expected by the discriminating American waterfowler. Angus has produced excellent puppies now started in the UK. His pups are stocky, attractive labs with pleasing tractable dispositions.

Angus comes from proven genetics. His sire, FTW Ashbrooke Alfie, is a producer of numerous superb labs in England and Ireland. His half brothers, sired by Alfie, include FTCh Ulstare Style, who has qualified for the British Championship seven times and placed 3rd in 1999, International FTCh Ulstare Oak and numerous other Field Trial Champions and contenders currently running in the UK.

Angus has the confirmation of a proper Labrador—square head, defined stop and broad muzzle, flat ears, sleek muscular body and thick tail.
