

**Aithness Allie
Hamish
Imported 2003, Weight - 71lbs.**

Hamish is a brilliant upland flushing British lab. He was imported to us as a young starter from Scotland. He immediately demonstrated exceptional talents: excellent nose, style, speed, and the love to hunt cover. Also, his sire and dam are both Field Trial Champions and 3 of his grandsires are International Field Trial Champions and are considered among the most influenced sires in UK Labrador history.

Hamish was trained at Wildrose as an upland gundog after his basic waterfowl retriever work was completed. He is a natural flusher and excellent on dove as well... a truly versatile retriever. He is the only gundog I have ever trained who was “naturally” steady to flush and shot... no training was necessary.

Hamish is an extremely birdy dog with amazing athletic ability. He has cleared a 4-strand barbed wire fence retrieving an upland bird both going and returning. Hamish pups are deep red in color and train off as stylish, fast, easy-to-train game dogs equally proficient on upland or waterfowl.

Hamish on point!

Hamish is excellent at picking fur!
